

Electrical components from Perkins

Get your engine ready for the winter

Perkins genuine spare parts stand for strong performance, high quality and reliability. Benefit from more than 90 years of experience in the development of robust engines and drive solutions. With Perkins genuine spare parts, you can be sure that your engine is always ready for action – even in cold weather.

Perkins electrical components – precisely tailored to your engine

Low temperatures impair the performance of your engine's electrical components, such as the starter motor, alternator and glow plugs. Perkins genuine spare parts are optimised for your engine and will get it safely through the cold season.

Your advantages

- Perkins genuine spare parts for the winter season at very attractive prices
- Safe and reliable engine starting even at low temperatures
- Optimal basis for a long service life of your engine
- Short-term availability of the spare parts

By the way: Perkins starters and alternators are designed for a long service life. Each individual starter motor can be started at least 36,000 times – that's about ten times a day for almost ten years.

As your exclusive Perkins distributor, BU Power Systems offers genuine quality at reasonable prices. We would be happy to make you an offer. Please do not hesitate to contact us by phone on +49 5451 5040 0 or by email at parts@bu-power.de and get your engine ready for winter now.

Please remember

When the alternator is replaced, the V-belt should also be replaced. Perfectly matching components ensure that your engine runs reliably.
