

Running again in no time

With Perkins exchange engines

An engine failure always comes at the wrong time. And often it happens just when the machine is desperately needed. In this case, BU Power Systems offers a solution: With Perkins exchange engines, your machine is ready for operation again within a short time and your downtime is minimised.

The fast and cost-effective alternative

As an official Perkins distributor, BU Power Systems offers you a constant availability of over 200 exchange engines in stock. From long engines to (repaired) short and long blocks to complete engines, we offer you a fast and economical solution in the event of an engine defect. We are your contact for Perkins exchange engines – from 100 to 4000 series engines.

Quality you can rely on

Whether overhauled by BU Power Systems or supplied directly by Perkins, all exchange engines have one thing in common: they undergo a test bench run before delivery. With an exchange engine overhauled by BU Power Systems, you can be sure that it works perfectly and meets our high quality and performance standards.

Our tip

You have an engine with a particularly long service life that has already been fitted with a second oversize and the only thing left to do is scrap it? We still have an ace up our sleeve: With Perkins® repair sleeves, your engine block can be reused. This saves you the cost of purchasing a completely new engine.

Do you have any questions about Perkins exchange engines? Simply contact us by phone on +49 5451 5040 0 or by email at tauschmotoren@bu-power.de.
