

Genuine Matters

Extend the lifetime of your machine with Perkins genuine spare parts.

Engines consist of a large number of individual parts that are perfectly harmonised and further developed by the manufacturer. The optimised interaction of the individual parts gets the best out of your engine: Maximum performance and a long lifetime. With Perkins genuine spare parts, you can count on this.

Why choose genuine quality?

Even if imitation spare parts look like the original, they can differ significantly in their technical specifications. This can not only have a negative impact on the performance and fuel consumption of your engine, but can also lead to serious damage. Therefore, invest in genuine quality and avoid potential risks.

BU Power Systems – your partner for genuine quality from Perkins

High-quality spare parts for high-quality engines: Perkins genuine spare parts are specially developed thanks to decades of experience, correspond to the latest state of series technology and harmonise perfectly and reliably with your engine. BU Power Systems is your partner for all engine-related matters: From customised Perkins engines and spare parts to maintenance and service.

By the way: In addition to a wide range of genuine spare parts, BU Power Systems also offers remanufactured components such as cylinder heads. The cylinder head is an essential part of your engine: It influences its performance, efficiency and reliability. An intact cylinder head is therefore essential. Simply contact us, we will be happy to help you. You can reach us via our service telephone 0800 5451 5451 or by email sent to parts@bu-power.de.
